ClearSign Wins New Technology Development Of The Year Award At 2014 West Coast Oil & Gas Awards

SEATTLE, Oct. 22, 2014 /PRNewswire/ -- ClearSign Combustion Corporation (NASDAQ: CLIR), an emerging leader in combustion and emissions control technology for industrial, commercial and utility markets, announced today it has won the "New Technology Development of the Year Award" at the 2014 West Coast Oil & Gas Awards, an industry initiative to recognize forward-thinking organizations across the oil and gas industry.

ClearSign won the award for advancements in the emissions control space with its Duplex ™ Tile technology. CEO Rick Rutkowski accepted the award on behalf of the company at a gala dinner held in Bakersfield, Calif. last night.

"We are thrilled to have been selected to receive this award from among such a distinguished group of our peers," Rutkowski said. "We believe that ClearSign's Duplex Tile technology can indeed have a significant impact in the oil and gas industry by achieving next-generation NOx emissions control combined with major performance improvements that can enable reduced operating cost and increased capacity in upstream, midstream and downstream operations. We are grateful for this strong endorsement of our achievement as we prepare to launch this game-changing technology into the market."

Judged by more than 110 senior executives from midstream and exploration and production companies, the West Coast Oil & Gas Awards saw over 120 companies participate across multiple categories. The Awards champion companies that display best practices in the key areas of operational excellence, environmental stewardship, corporate social responsibility and excellence in health & safety.

About ClearSign Combustion Corporation

ClearSign Combustion Corporation designs and develops technologies that aim to improve key performance characteristics of combustion systems including energy efficiency, emissions control, fuel flexibility and overall cost effectiveness. Our Duplex™ Tile and Electrodynamic Combustion Control™ (ECC™) platform technologies improve control of flame shape and heat transfer and optimize the complex chemical reactions that occur during combustion in order to minimize harmful emissions.
