

ClearSign to Present at the American Flame Research Committee (AFRC) in Salt Lake City

SEATTLE, Sept. 10, 2015 /PRNewswire/ -- [ClearSign Combustion Corporation](#) (NASDAQ: [CLIR](#)) announced today that CTO Joe Colannino will present at the American Flame Research Committee (AFRC) meeting today, September 10, 2015 at the Historic Fort Douglas Officer's Club at the University of Utah in Salt Lake City, Utah. ClearSign's presentation is scheduled to begin at 2:00 PM PDT. The presentation will discuss the unique capabilities of the patent pending Duplex™ Technology to reduce emissions and enhance operating performance for process furnaces in refinery applications.

About American Flame Research Committee (AFRC)

The **American Flame Research Committee (AFRC)** is composed of representatives of industrial and research organizations and associated eminent combustion expert members in the United States, Canada and Mexico. The AFRC sponsors open forums in North America on applied combustion technology and research and supports the applied combustion research activities of the [International Flame Research Foundation \(IFRF\)](#). The [IFRF](#) is a worldwide network of industrial companies and academic institutes working to achieve cleaner and more efficient industrial combustion. The main task of the Foundation is thus the acquisition and generation of information with which to design flames for the efficient heating of industrial processes, with minimal environmental effects, and thereafter the design of combustion equipment to produce such flames.

The **AFRC** is a suborganization of the world wide [International Flame Research Foundation \(IFRF\)](#)

About ClearSign Combustion Corporation

[ClearSign Combustion Corporation](#) designs, develops and markets technologies that drive to improve key performance characteristics of combustion systems, including emissions and operational performance, energy efficiency and overall cost-effectiveness. Our patent-pending Duplex™ and Electrodynamic Combustion Control™ platform technologies enhance the performance of combustion systems in a broad range of markets, including the chemical, petrochemical, refinery, power and commercial boiler industries. Cautionary note on forward-looking statements

This press release includes forward-looking information and statements within the meaning of the Private Securities Litigation Reform Act of 1995 and the provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Except for historical information contained in this release, statements in this release may constitute forward-looking statements regarding our assumptions, projections, expectations, targets, intentions or beliefs about future events that are based on management's belief, as well as assumptions made by, and information currently available to, management. While we believe that our expectations are based upon reasonable assumptions, there can be no assurances that our goals and strategy will be realized. Numerous factors may affect our actual results and may cause results to differ materially from those expressed in forward-looking statements made by us or on our behalf. Some of these factors include the acceptance of existing and future products, the impact of competitive products and pricing, general business and economic conditions, and other factors detailed in our Annual Report on Form 10-K and other periodic reports filed with the SEC. We specifically disclaim any obligation to update or revise any forward-looking statement whether as a result of new information, future developments or otherwise.
