

## **ClearSign Announces New Senior Vice President of Business Development Industry Veteran to Leverage Experience and Momentum**

SEATTLE, July 18, 2017 /PRNewswire/ -- [ClearSign Combustion Corporation](#) (NASDAQ: CLIR), a leading provider of industrial combustion technologies that deliver unmatched reduction of pollutant emissions while improving operational costs, today announced that Stephen M. Sock joined the company as Senior Vice President of Business Development effective July 17, 2017. Steve will be taking over for Andrew Lee, who has previously announced his plans to retire this year.

Steve joins ClearSign from Burrow Global where he served as Business Development Manager Prior to this assignment, Steve had a successful twenty-five year career with Amec Foster Wheeler and their successor companies in the global engineering and construction industry in positions of increasing responsibility including Director of Technology Business Development, Global Key Account Executive and Vice President – Commercial. Steve joined Foster Wheeler as a Process Engineer directly from Lehigh University, where he studied chemical engineering.

"I'm very enthusiastic to join the ClearSign team and look forward to using my industry experience to help bring this game changing technology to an ever expanding market," said Steven Sock.

ClearSign's Chairman and CEO, Stephen Pirnat stated, "We are excited to have Steve join the ClearSign team. Steve brings to ClearSign vast oil and gas industry experience, along with an important knowledge of the combustion industry. We believe he is ideally suited for this position, can build on our industry momentum and look forward to his contributions to the company."

### **About ClearSign Combustion Corporation**

ClearSign Combustion Corporation designs and develops products and technologies for the purpose of improving key performance characteristics of combustion systems, including emissions and operational performance, energy efficiency and overall cost-effectiveness. Our patented Duplex™ and Electrodynamic Combustion Control™ platform technologies enhance the performance of combustion systems in a broad range of markets, including the energy (upstream oil production and down-stream refining), commercial/industrial boiler, chemical, petrochemical, and power industries. ### **Cautionary note on forward-looking statements**

All statements in this press release that are not based on historical fact are "forward-looking statements." While management has based any forward-looking statements included in this press release on its current expectations, the information on which such expectations were based may change. These forward-looking statements rely on a number of assumptions concerning future events and are subject to a number of risks, uncertainties and other factors, many of which are outside of our control, which could cause actual results to materially differ from such statements. Such risks, uncertainties and other factors include, but are not limited to, general business and economic conditions, the performance of management and our employees, our ability to obtain financing, competition, whether our technology will be accepted and other factors that are to be detailed in our periodic and current reports available for review at [www.sec.gov](http://www.sec.gov). Furthermore, we operate in a competitive environment where new and unanticipated risks may arise. Accordingly, investors should not place any reliance on forward-looking statements as a prediction of actual results. We disclaim any intention to, and undertake no obligation to, update or revise forward-looking statements to reflect events or circumstances that subsequently occur or of which we hereafter become aware.
